*Founded in 1992, the Center for the Advanced Study of India (CASI) at the University of Pennsylvania is the first research institution in the United States dedicated to the study of contemporary India. A national resource, it fills an urgent need for objective knowledge of India's politics and society, rapidly changing economy, and transformation as an ancient civilization and emerging major power. The Center's key goals are to nurture a new generation of scholars across disciplines and to provide a forum for dialogue among the academic, business, and foreign policy communities. <http://casi.ssc.upenn.edu>*
