

"This is, quite simply, the best book about India today."

— Fareed Zakaria, CNN host and author of *The Post-American World*

The rise of smartphones—and with them access to the Internet—has caused nothing short of a revolution in India. *India Connected* takes readers on a journey across India to show how these devices have helped people leapfrog over the technological advances of the West, disrupting centuries of tradition and barriers of wealth, language, literacy, caste, and gender.

**Ravi Agrawal** is the managing editor of *Foreign Policy* and an award-winning journalist. He previously worked for CNN for more than a decade in London, New York, and New Delhi, where he served as South Asia bureau chief. Agrawal currently lives in Brooklyn. *India Connected* is his debut book.
