

Structured Inequalities: ***Factors Associated with Spatial Disparities in Maternity Care in India***

SONALDE DESAI
Professor, University of Maryland at College Park

THURSDAY, OCTOBER 29, 2009

SONALDE DESAI is a demographer whose work deals primarily with social inequalities in developing countries with a particular focus on gender and class inequalities. She studies inequalities in education, employment and maternal and child health outcomes by locating them within the political economy of the region. While much of her research focuses on South Asia, she has also engaged in comparative studies across Asia, Latin America and Sub Saharan Africa. She has published articles in a wide range of sociological and demographic journals including *American Sociological Review*, *Demography*, *Population and Development Review* and *Feminist Studies*. Desai received a Ph.D. in Sociology from Stanford University and has held post-doctoral fellowships at the University of Chicago and the RAND Corporation.

tel: 215.746.3159

LIGHT REFRESHMENTS WILL BE SERVED.

About CASI

Founded in 1992, the Center for the Advanced Study of India (CASI) at the University of Pennsylvania is the first and only research institution in the United States dedicated to the study of contemporary India. A national resource, it fills an urgent need for objective knowledge of India's politics and society, rapidly changing economy, and transformation as an ancient civilization and emerging major power. The Center's key goals are to nurture a new generation of scholars across disciplines and to provide a forum for dialogue among the academic, business, and foreign policy communities.
