Lecturer in Political Science, Yale University

As India grapples with renewed global attention following the recent events in Kashmir, this seminar will examine the challenges to India's national security. As an emergent power, India is an important country in Asia, with its economic and geo-political strength being noticed globally. A major share of the country's heft comes from its national security paradigm, which has undergone a significant shift in recent years and faces both old and new challenges. This seminar will look at these challenges by examining the basis of India's national security and its evolution in its various dimensions.
